CONFIDENTIAL — STB CYBERSECURITY

STB Cybersecurity (STBCS)

Technical & Executive Platform Report

Prepared by: STB Cybersecurity Engineering Domain: stbcybersecurity.com Contact: (855) STB-1987 | kbpc.inc@gmail.com Report Date: March 2026

Executive Summary

STB Cybersecurity (STBCS) is a comprehensive, production-grade cybersecurity intelligence platform purpose-built for small and medium-sized businesses. The platform delivers enterprise-level threat visibility, security tooling, and professional services at accessible price points — eliminating the need for expensive SIEM deployments or dedicated SOC teams.

STBCS continuously aggregates data from **134 built-in threat intelligence feeds** (plus 9 optional API-key integrations) across 8 categories, processes it through automated enrichment pipelines, and presents actionable intelligence through an intuitive, real-time dashboard. The platform combines passive threat monitoring with active security tools — including network scanners, file analysis, SSL inspection, DNS security analysis, and more — giving security teams and business owners a single pane of glass for their entire threat landscape.

Beyond tooling, STBCS offers hands-on professional services: **Cybersecurity Consulting, Incident Response, Ransomware Recovery & Restoration, and Threat Hunting** — delivered by experienced professionals who understand the unique constraints of SMB environments.

Key Differentiators

- **134 built-in threat feeds** refreshed every 15 minutes — no API keys required for core coverage, plus 9 optional API-key integrations for enhanced enrichment
- **18+ integrated security features** spanning threat intelligence, active scanning, compliance mapping, and community knowledge sharing
- **Professional services** bundled alongside the platform — not just data, but expert guidance when it matters most
- **SMB-first pricing** starting at \$0/month for core intelligence, with paid tiers from \$7.49/month
- **Always-on infrastructure** deployed as a dedicated VM with resilient database connections and automated background services
- **Built-in compliance mapping** for NIST CSF 2.0, CIS Controls v8, and ISO 27001
- **Community-driven Knowledge Base** with gamification, reputation system, and automated cybersecurity news aggregation from 12 authoritative sources

Company & Mission

STB Cybersecurity exists to close the security gap for small and medium-sized businesses. While large enterprises have dedicated SOC teams, million-dollar SIEM licenses, and in-house threat analysts, SMBs are often left with consumer-grade antivirus and hope.

STBCS changes that equation. We deliver the same caliber of threat intelligence, monitoring, and incident response that Fortune 500 companies rely on — packaged for teams of 1 to 100.

Professional Services

SERVICE	DESCRIPTION
Cybersecurity Consulting	Security assessments, policy development, architecture review, and strategic planning tailored to SMB budgets and compliance requirements
Incident Response	Rapid-response engagement for active breaches, with containment, eradication, recovery, and post-incident analysis
Ransomware Recovery & Restoration	Specialized recovery services including negotiation support, decryption assistance, data restoration, and hardening against re-infection
Threat Hunting	Proactive threat detection using IOC correlation, behavioral analysis, and MITRE ATT&CK-mapped hunting playbooks

Platform Features

1. Real-Time Threat Intelligence Dashboard

The STBCS dashboard is the operational nerve center. It provides at-a-glance visibility into the current threat landscape with live-updating metrics, a scrolling threat ticker, and interactive data visualizations.

Capabilities:

- Live threat statistics: total CVEs, ransomware incidents, malicious IPs/URLs, active threat groups, breach count
- Daily delta tracking (new threats today vs. historical baseline)
- Security Posture Widget with progress ring showing organizational readiness
- Global threat heatmap (SVG world map) showing ransomware attack distribution by country
- Trending threat actors and most-targeted sectors
- EPSS (Exploit Prediction Scoring System) integration for CVE prioritization

2. Vulnerability & Exploit Intelligence

Full CVE database with enrichment from NVD, CISA KEV, FIRST.org EPSS, GitHub GHSA, and 6+ exploit sources.

- Searchable CVE database with severity filtering (Critical/High/Medium/Low)
- CVSS scoring with EPSS exploit probability percentiles
- Exploit Maturity Timeline — visual 4-stage lifecycle tracker per CVE (Disclosed → PoC Available → Actively Exploited → Patch Available)
- CISA Known Exploited Vulnerabilities (KEV) flagging
- Proof-of-Concept availability tracking from Exploit-DB, trickest/cve, Nuclei Templates, and Metasploit
- Affected product correlation and vendor-specific filtering
- Social sharing and "Share as Image" for CVE cards

3. Ransomware Intelligence Center

Tracks ransomware incidents, group activity, victim claims, and attack patterns in real time.

Capabilities:

- Real-time victim tracking from ransomware.live, RansomLook.io, RansomWatch, Ransomwhere, DarkFeed.io, and CISA #StopRansomware
- Group profiles with detailed TTP analysis, MITRE ATT&CK mapping, known CVEs, malware families, and infrastructure details
- Sector and country targeting analysis with interactive filtering
- Ransom amount tracking, payment status, and Bitcoin wallet correlation
- Attack vector classification and victim revenue/employee count context
- Ransomware-as-a-Service (RaaS), double extortion, and data exfiltration indicators
- Groups Directory with comprehensive profiles including aliases, affiliations, law enforcement actions, and government advisories

4. Ransomware Cost Estimator

Interactive calculator helping businesses estimate potential ransomware impact.

Capabilities:

- Industry-specific risk modeling
- Revenue-based impact projection
- Recovery timeline estimation
- Insurance coverage gap analysis
- Actionable mitigation recommendations

5. Threat Actor & APT Tracking

Comprehensive adversary intelligence from MITRE ATT&CK, MISP Galaxy, and curated research sources.

Capabilities:

- Detailed actor profiles with aliases, origin, TTPs, target sectors, and target countries
- Active/inactive status tracking with first-seen and last-active timestamps
- Malware family associations and infrastructure mapping
- Linked CVEs and attack vectors

- Negotiation tactics and ransom collection history for ransomware operators

6. IOC Database & Search

Massive indicator-of-compromise database spanning malicious IPs, URLs, and domains.

Capabilities:

- **Malicious IP Database:** Aggregated from 50+ blocklists including IPsum, Feodo Tracker, SANS DShield, Tor Exit Nodes, Blocklist.de, FireHOL, Spamhaus DROP/EDROP, and dozens more
- **Malicious URL/Domain Database:** URLhaus, OpenPhish, PhishTank, CERT.PL, Malware Filter, Hagezi TIF, Bambenek C2, and more
- Full-text search across all IOC types with source, threat type, and risk score filtering
- IP geolocation, ASN, ISP, reverse DNS, and open port metadata
- Abuse confidence scoring and report count tracking
- STIX 2.1 export for Pro/Business users

7. Data Breach Database

Tracks major breach incidents with affected account counts, exposed data types, and verification status.

Capabilities:

- Breach timeline with discovery and modification dates
- Affected account count and exposed data class enumeration (emails, passwords, financial data, etc.)
- Verified, fabricated, sensitive, and retired breach flagging
- Domain-based search for organizational exposure assessment

8. ICS-CERT Advisory Tracker

Industrial Control System advisories from CISA ICS-CERT.

Capabilities:

- Advisory database with vendor, product, CVSS score, and severity classification
- Linked CVE cross-referencing
- Affected systems and mitigation guidance
- Published date tracking and update monitoring

9. Security Tools Suite

A comprehensive collection of active security assessment tools accessible directly from the browser.

TOOL	DESCRIPTION	TIER
WHOIS Lookup	Domain registration and ownership intelligence	Free
Port Scanner	TCP port scanning against common service ports	Free
Threat Database Check	Cross-reference IPs/domains against 130+ threat feeds	Free
Password Strength Analyzer	Entropy-based password evaluation with breach checking	Free
Subnet Calculator	CIDR notation calculator with network/broadcast/host details	Free
Cyber Risk Score Calculator	Organizational security posture assessment questionnaire	Free
SSL/TLS Certificate Checker	Deep SSL inspection with certificate chain validation, expiry tracking, and issuer analysis	Pro
DNS Security Analyzer	Comprehensive DNS record analysis (A, AAAA, MX, NS, TXT, SOA, CAA, DMARC, SPF, DKIM)	Pro
HTTP Security Headers Scanner	Evaluates Content-Security-Policy, HSTS, X-Frame-Options, and 10+ security headers	Pro
Web Server Fingerprinting	Technology stack detection, server identification, and framework analysis	Pro
Microsoft Exchange Checker	Exchange/OWA endpoint detection and configuration analysis	Pro
Email Header Analyzer	Full email header parsing with SPF/DKIM/DMARC validation, hop analysis, and delay detection	Pro
File Scanner	Upload-based file analysis for suspicious content detection	Pro
Encoding/Decoding Tools	Base64, URL encoding, hex, HTML entities, and hash generation (MD5, SHA-1, SHA-256, SHA-512)	Pro
SSH Terminal	Browser-based SSH client for remote server management	Business
SFTP Client	Secure file transfer directly from the browser	Business
Telnet Client	Legacy protocol access for network device management	Business
Remote Desktop	Browser-based RDP client for Windows server administration	Business

10. Uptime & SSL Monitoring

Always-running monitoring engine that checks endpoints and SSL certificates on configurable intervals.

Capabilities:

- HTTP/HTTPS endpoint monitoring with configurable check intervals (default 5 minutes)
- Response time tracking with average calculation and degraded state detection (>5 seconds)
- SSL certificate expiry monitoring with configurable threshold alerts (default 14 days)

- SSL issuer, validity, and TLS protocol version tracking
- Automated incident creation and resolution for downtime and SSL events
- Email alerts for down, recovery, and SSL expiry events with branded HTML templates
- Uptime percentage calculation and consecutive failure tracking
- Batch processing (5 monitors per batch with 1-second inter-batch delay) to prevent network saturation

11. Attack Surface Discovery

Automated external attack surface mapping for business domains.

Capabilities:

- Domain-based reconnaissance and asset enumeration
- Asset type classification with severity rating
- Scan history and status tracking
- Exportable findings for remediation workflows

12. Threat Intelligence Reports

Automated and on-demand threat landscape reports.

Capabilities:

- Configurable report periods with scheduled generation (weekly cadence)
- Comprehensive threat data aggregation across all intelligence sources
- Report archive with status tracking
- Pro/Business tier feature

13. Compliance Mapper

Maps organizational security controls to major compliance frameworks.

Capabilities:

- **NIST Cybersecurity Framework (CSF) 2.0** control mapping
- **CIS Controls v8** implementation guidance
- **ISO 27001** Annex A alignment
- Gap analysis and remediation recommendations
- Interactive control selection with coverage visualization

14. STB-Sync Dynamic Firewall Block Lists

Enterprise firewall integration delivering live threat data as External Dynamic Lists (EDLs).

Capabilities:

- Token-authenticated EDL URLs compatible with Palo Alto Networks, pfSense, Fortinet, and SonicWall
- Top 10,000 malicious IPs and domains sourced from 130+ threat feeds
- Three list formats: IPs only, domains only, or combined
- Plain-text output format for universal firewall compatibility

- 5-minute server-side cache with 30 requests/hour rate limiting per token
- Business tier feature

15. Do Not Click — Phishing Awareness Bulletins

Automated phishing awareness system that analyzes live threat data and generates actionable bulletins for employee training.

Capabilities:

- Automated analysis of malicious URLs with phishing/verified phishing classifications
- Brand impersonation detection for 40+ commonly targeted brands
- Attack type classification (credential harvest, payment scam, delivery scam, etc.)
- Three output formats: plain text, HTML email, and Markdown
- Daily bulletins (07:00 UTC) and weekly summaries (Mondays)
- Copy-paste toolbar for easy distribution to teams
- Threat level bar and brand badges for visual communication
- Pro-gated bulletin archive

16. Knowledge Base & Community Hub

Community-driven cybersecurity knowledge sharing platform with full RBAC, content moderation, and gamification.

Capabilities:

- Rich markdown content with code syntax highlighting
- Auto-sourced articles from 12 cybersecurity news feeds (The Hacker News, BleepingComputer, Krebs on Security, Dark Reading, CISA, Cisco Talos, Securelist, Schneier on Security, Naked Security, SentinelOne, Recorded Future)
- Automated content tagging across 12 security categories (ransomware, malware, vulnerability, phishing, dark-web, incident-response, threat-actor, law-enforcement, critical-infrastructure, cloud, IoT, AI-security)
- Community posting, commenting (threaded), voting, and bookmarking
- Reputation system with 6 ranks: Recruit (0) → Analyst (10) → Specialist (50) → Expert (150) → Elite (300) → Legend (500)
- Trusted contributor status at 50+ reputation points
- Badges and achievements system
- Contributor of the Week auto-calculated spotlight
- Content moderation with reporting system and admin review
- 8 seed community members for social proof
- 90-day auto-cleanup of low-engagement bot-sourced articles

17. Interactive Incident Response Playbooks

Step-by-step guides for common security incidents.

Capabilities:

 5 comprehensive incident response playbooks

- Interactive checklist format
- MITRE ATT&CK aligned procedures
- Downloadable for offline reference

18. Brand Kit & Professional Templates

Complete brand asset hub for creating professional security documentation and marketing materials.

Capabilities:

- Email signatures with customizable templates
- Letterhead templates
- Business card designs
- Invoice templates
- Social media graphics
- Presentation templates
- Desktop/mobile backgrounds
- Report cover designs
- Pitch deck templates
- Certificate templates

Subscription Tiers & Pricing

STBCS uses a freemium model with four paid tiers, all currently offered at **50% off** introductory pricing. Subscriptions are managed through Stripe with both monthly and annual billing options.

FEATURE	FREE	SUPPORTER	PRO	BUSINESS	UNLIMITED
Monthly Price	\$0	\$7.49	\$24.99	\$99.99	\$249.99
Annual Price	\$0	\$74.95	\$249.95	\$999.95	\$2,499.95
Real-time threat dashboard	Yes	Yes	Yes	Yes	Yes
130+ threat intelligence feeds	Yes	Yes	Yes	Yes	Yes
Ransomware group tracker	Yes	Yes	Yes	Yes	Yes
CVE & exploit database	Yes	Yes	Yes	Yes	Yes
Data breach database	Yes	Yes	Yes	Yes	Yes
ICS-CERT advisories	Yes	Yes	Yes	Yes	Yes
Free security tools (6)	Yes	Yes	Yes	Yes	Yes
Uptime monitoring	-	Yes	Yes	Yes	Yes
SSL certificate monitoring	-	Yes	Yes	Yes	Yes
Advanced security tools (8)	-	-	Yes	Yes	Yes
Data export (CSV/JSON/STIX)	-	-	Yes	Yes	Yes
API access	-	-	Yes	Yes	Yes
Compliance mapping	-	-	Yes	Yes	Yes
Attack surface discovery	-	-	-	Yes	Yes
Threat intelligence reports	-	-	-	Yes	Yes
STB-Sync firewall EDLs	-	-	-	Yes	Yes
SSH/SFTP/Telnet/RDP clients	-	-	-	Yes	Yes
Dark web monitoring	-	-	-	Yes	Yes
Unlimited everything	-	-	-	-	Yes

Technology Stack

Frontend

Component	Technology	Version
Framework	React	19.2
Language	TypeScript	5.6
Routing	Wouter	3.3
State Management	TanStack React Query	5.60
UI Components	shadcn/ui (Radix UI primitives)	Latest
Styling	Tailwind CSS	4.1
Animations	Framer Motion	12.23
Charts	Recharts	2.15
Build Tool	Vite	7.1
Icons	Lucide React	0.545
Forms	React Hook Form + Zod resolvers	7.66
Terminal Emulator	xterm.js	6.0
Payment UI	Stripe React / Stripe.js	5.6 / 8.8

Design System: "Stealth Mode / Tactical Operations Center" — dark minimal backgrounds with orange/red accents, cyber-themed iconography. Typography uses Orbitron (display), Inter (body), and JetBrains Mono (code). Custom branded SVG icon components for security services.

Accessibility (WCAG 2.1):

- Non-text contrast (SC 1.4.11): All interactive element borders meet 3:1+ contrast ratio
- Button accessible names: All icon-only buttons include `aria-label` attributes (25+ buttons across 15+ files)
- Focus indicators: Full-opacity primary red focus rings for 3:1+ contrast

Internationalization: Supports 10 languages with browser auto-detection.

Code Splitting: All 65+ page components use React `lazy()` with Suspense boundaries for optimal loading performance.

Backend

Component	Technology	Version
Runtime	Node.js	20.x
Framework	Express	5.0
Language	TypeScript (ESM)	5.6
ORM	Drizzle ORM	0.39
Validation	Zod	3.25
Authentication	bcryptjs + cryptographic session tokens	3.0
Email	Resend	4.0
Payments	Stripe	20.0
SSH/SFTP	ssh2	1.17
Image Generation	Satori + @resvg/resvg-js + Sharp	Latest
QR Codes	qrcode	1.5
RSS Parsing	rss-parser	3.13
Build System	esbuild	0.25
Dev Runner	tsx	4.21

Database

Component	Detail
Engine	PostgreSQL 16
ORM	Drizzle ORM with drizzle-zod for validation
Connection Pool	Max 15 (prod) / 10 (dev), Min 2/1, 15s idle timeout, 15s connection timeout, 60s statement timeout
Tables	52 tables covering threat data, users, sessions, monitoring, community, billing, and analytics
Integrity	Unique constraints, composite indexes, atomic upserts, database transactions
Resilience	<code>withDbRetry</code> wrappers on all background services with transient error classification

COMPONENT	DETAIL
Hosting	Replit VM (always-running)
Domain	stbcybersecurity.com
TLS	Automatic via Replit
Build Chain	<code>npm run build</code> → esbuild → <code>dist/index.cjs</code> (CJS wrapper) → <code>start.js</code> (launcher) → <code>index.js</code> (ESM, ~2.1MB)
Deployment	<code>deploymentTarget = "vm"</code> with <code>build</code> and <code>run</code> commands

Threat Intelligence Architecture

Feed Categories & Coverage

STBCS aggregates data from **134 built-in threat intelligence feeds** organized into 8 categories, with 9 additional optional API-key integrations for enhanced enrichment. The number of active feeds depends on which optional API keys are configured — all 134 core feeds run without any API keys. All feeds refresh on a 15-minute cycle.

Category 1: Core Vulnerability Intelligence (5 feeds)

NVD API, CISA Known Exploited Vulnerabilities, CIRCL CVE, GitHub Security Advisories (GHSA), FIRST.org EPSS API

Category 2: Exploit & Zero-Day Intelligence (6 feeds)

Exploit-DB CSV, InTheWild.io, trickest/cve PoC repository, Nuclei Templates CVE, VulnCheck KEV, Metasploit Modules

Category 3: IP Blocklists & Reputation (35+ feeds)

IPsum, Feodo Tracker, SANS DShield, Tor Exit Nodes, SSL Blacklist, Blocklist.de (all/apache/ssh/mail), CINS Army, GreenSnow, EmergingThreats, Spamhaus DROP/EDROP, FireHOL (Level 1/Level 2/Abusers), C2Tracker, CleanTalk, C2IntelFeeds, Dataplane (SSH/VNC/DNS/SIP), BinaryDefense, Turris Sentinel, AlienVault Reputation, StopForumSpam, Team Cymru Bogons, CESNET NERD, CriticalPath (Cobalt Strike/abuse.ch), NormShield, NixSpam, Bruteforce Blocker, Cybercrime IPs, CyberCure, Botvrij.eu, Rutgers SSH Blacklist, DigitalSide Threat-Intel, SecRecon C2

Category 4: URL/Domain Threat Feeds (18+ feeds)

URLhaus CSV, OpenPhish, PhishTank, C2IntelFeeds Domains, CERT.PL, Malware Filter (Phishing/URLhaus), Inversion DNSBL, Hagezi TIF, Prigent Malware, AdGuard DNS, Red Flag Domains, Maltrail (Suspicious/Malware), Disconnect Malvertising, Phishing Database (IPs/Domains/URLs), Stamparm Blackbook, Bambenek C2

Category 5: Malware & C2 Infrastructure (6+ feeds)

ThreatFox (API/CSV), MalwareBazaar (Recent/Tags), YARAify Recent, Malpedia Families, SSLBL Certificates

Category 6: Ransomware Intelligence (8+ feeds)

ransomware.live, RansomLook.io, RansomWatch (standard/extended), Ransomwhere, CISA #StopRansomware, DarkFeed.io, Ransomware IOC Repositories, Feodo Ransomware Loaders

Category 7: Threat Actor & APT Intelligence (6+ feeds)

MITRE ATT&CK Groups, MISP Threat Actor Galaxy, TweetFeed, APT Notes, Targeted Threats, Sophos/ESET/Talos IOC repositories

Category 8: News & Research RSS (20+ feeds)

Google Project Zero, Google Security Blog, MSRC, NCSC UK, CERT-EU, Packet Storm, Sophos News, Schneier on Security, WeLiveSecurity, Cisco Talos Blog, SentinelOne, Microsoft Security, US-CERT, Check Point Research, Mandiant, Recorded Future, Unit 42, Google Cloud Threat Intel, Microsoft Threat Intel, CrowdStrike Blog

Optional API-Key Integrations (9 services)

AlienVault OTX, VirusTotal, Hybrid Analysis, GreyNoise, CrowdSec, Shodan, Pulsedive, HoneyDB, AbuseIPDB

Data Processing Pipeline

```
External Feeds (134 built-in + up to 9 API-key integrations)
|
▼
Scraper Engine (15-min cycle)
|
├─ Deduplication (in-memory + database-level unique constraints)
├─ Enrichment (EPSS scoring, CISA KEV cross-reference, exploit maturity)
├─ Classification (threat type, severity, source attribution)
|
▼
PostgreSQL (52 tables, indexed for fast query)
|
├─ REST API (/api/*) with Zod validation
├─ In-memory response cache (TTL-based)
├─ Rate-limited endpoints (tiered by subscription)
|
▼
React Frontend (real-time dashboard, interactive tools)
```

Background Services Architecture

STBCS runs four autonomous background services that operate continuously without manual intervention.

1. Threat Intelligence Scrapers (`scrapers.ts`)

STB Cybersecurity • stbcybersecurity.com • (855) STB-1987

- **Cycle:** Every 15 minutes

- **Coverage:** 134 built-in feeds across 8 categories (plus up to 9 additional API-key integrations when configured)
- **Resilience:** All database operations wrapped with `withDbRetry`; transient errors (connection timeout, pool exhaustion, connection reset) are classified by `isTransientDbError()` and retried up to 2 times with exponential backoff (2s, 4s)
- **Deduplication:** In-memory tracking + database unique constraints prevent duplicate records

2. Uptime Monitoring Engine (`uptimeEngine.ts`)

- **Cycle:** Configurable per monitor (default 300 seconds)
- **Processing:** Batches of 5 monitors with 1-second inter-batch delay
- **Checks:** HTTP/HTTPS endpoint availability, response time, SSL certificate inspection (validity, expiry, issuer, TLS version)
- **Alerts:** Automated email notifications for down/recovery/SSL events via Resend
- **Incidents:** Automatic incident creation on state change (up→down), automatic resolution on recovery
- **Health Endpoint:** `getUptimeEngineHealth()` exposes `lastRunEnd` and `isRunning` status

3. Maintenance Scheduler (`maintenance.ts`)

- **Tasks:** Session cleanup, stale data purging, daily threat stats computation, admin reporting, watchlist monitoring, awareness bulletin generation
- **Staggering:** 3-second delay between each maintenance task to reduce concurrent database pressure
- **Error Handling:** `withRetry` wrapper with transient error classification; critical errors trigger admin notifications via email
- **Reporting:** Daily health checks and weekly summary reports sent to admin

4. Knowledge Base Scraper (`kbScraper.ts`)

- **Cycle:** Every 4 hours
- **Sources:** 12 cybersecurity RSS feeds (The Hacker News, BleepingComputer, Krebs on Security, Dark Reading, CISA, Cisco Talos, Securelist, Schneier on Security, Naked Security, SentinelOne, Recorded Future, Threatpost)
- **Processing:** RSS parsing → HTML stripping → auto-tagging (12 categories, up to 5 tags per article) → markdown formatting → deduplication by slug
- **Limits:** Max 15 posts per run, 7-day dedup window, 5 items per feed
- **Cleanup:** Daily purge of bot-sourced articles older than 90 days with zero votes and zero comments
- **Community Seeding:** 8 demo community members with varied tiers, reputation, and trusted status

API & Integrations

Public API v1

STBCS offers a RESTful API for programmatic access to threat intelligence data. Authentication is via API key (generated in the account dashboard).

Base URL: <https://stbcybersecurity.com/api/v1/>

Endpoints include:

- CVE/vulnerability data with search and filtering
- Ransomware incidents and group intelligence
- Malicious IP/URL/domain lookups
- Threat actor profiles
- Breach database queries
- CISA KEV and ICS-CERT advisories

Rate Limits by Tier:

TIER	API KEYS	REQUESTS/MINUTE	DAILY QUOTA	LIVE LOOKUPS/DAY
Free	-	10 (web)	-	-
Supporter	-	10 (web)	-	-
Pro	1	60	1,000	50
Business	5	120	10,000	200
Unlimited	10	300	100,000	1,000

Stripe Integration

- 4 subscription products: STBCS Supporter, STBCS Pro, STBCS Business, STBCS Unlimited Everything
- Managed via [stripe-replit-sync](#) with direct Stripe API fallback
- Embedded checkout flow with return handling
- Webhook processing for subscription lifecycle events

Resend Email Integration

- Transactional emails for uptime alerts (down/recovery/SSL expiry)
- Account security notifications (lockout alerts)
- Admin reports and critical error notifications
- Branded HTML email templates with dark theme styling

STB-Sync Firewall EDL Integration

- **Compatible Firewalls:** Palo Alto Networks, pfSense, Fortinet, SonicWall
- **Endpoint Format:** [GET /api/sync/:token/{ips|domains|combined}.txt](#)
- **Authentication:** URL-embedded token (firewalls cannot send HTTP headers)
- **Data:** Top 10,000 malicious IPs/domains from 130+ feeds, plain-text format
- **Caching:** 5-minute server-side cache, 30 requests/hour per token

Service Status Monitoring

STB Cybersecurity • stbcybersecurity.com • (855) STB-1987

- Monitors 37+ external services across multiple categories

- Integration with Statuspage.io APIs
- Real-time status dashboard at </service-status>

Security & Compliance

Authentication & Access Control

- **Password Policy:** Minimum 12 characters, requires uppercase + lowercase + number
- **Password Storage:** bcrypt hashing with work factor 12
- **Sessions:** Cryptographic tokens with configurable expiry, server-side validation
- **Account Lockout:** Automatic lockout after repeated failed login attempts with email notification
- **RBAC:** Tiered access control (Free → Supporter → Pro → Business → Unlimited) with admin override

Application Security

- **Security Headers:** Content-Security-Policy, Strict-Transport-Security (HSTS), X-Frame-Options, X-Content-Type-Options, Referrer-Policy, Permissions-Policy
- **Rate Limiting:** 6 tiers of rate limiting (general, strict, auth, free tools, pro tools, business tools) with subscription-aware middleware
- **Input Validation:** Zod schema validation on all API inputs with type-safe error responses
- **Session Security:** Cryptographic token-based sessions with secure cookie attributes (HttpOnly, SameSite)
- **API Key Security:** Keys are hashed before storage; only the prefix is stored in plaintext for identification

Data Privacy & Legal

- Comprehensive Privacy Policy at </privacy>
- Terms of Service at </terms>
- SMS Terms and TCPA compliance at </sms-terms>
- TCPA consent collection for live chat
- Cookie consent implementation
- Data minimization practices

Compliance Framework Support

- **NIST CSF 2.0:** Control mapping and gap analysis
- **CIS Controls v8:** Implementation guidance and coverage assessment
- **ISO 27001:** Annex A alignment and evidence mapping

SEO & Discoverability

- **Server-Side Meta Injection:** Dynamic OG titles, descriptions, and images per page
- **Dynamic OG Images:** Server-side SVG→PNG generation via Satori + resvg-js for social media preview cards

- **Structured Data:** 7 JSON-LD blocks for rich search results
- **Hreflang Tags:** 10 language variants for international search visibility
- **Dynamic XML Sitemap:** Auto-generated at `/sitemap.xml` including all threat group profile pages
- **robots.txt:** Configured to allow crawling of all public pages while excluding admin routes
- **Canonical URLs:** Proper canonical tag implementation across all routes

Database Schema Overview

The STBCS database comprises 52 PostgreSQL tables (defined in `shared/schema.ts`) organized into functional domains:

Threat Intelligence (9 tables)

`cves`, `ransomware_incidents`, `threat_actors`, `malicious_ips`, `malicious_urls`, `cisa_kev`, `cisa_ics_advisories`, `news_articles`, `breach_incidents`

User & Account Management (7 tables)

`users`, `sessions`, `subscriptions`, `user_settings`, `saved_searches`, `newsletter_subscriptions`, `contact_messages`

Monitoring & Alerting (7 tables)

`uptime_monitors`, `uptime_checks`, `uptime_incidents`, `dark_web_monitors`, `dark_web_findings`, `watchlist_items`, `monitor_alert_log`

Community & Content (7 tables)

`kb_posts`, `kb_comments`, `kb_votes`, `kb_bookmarks`, `kb_reports`, `feedback_submissions`, `content_views`

Security & Analytics (5 tables)

`audit_log`, `user_notifications`, `api_keys`, `api_key_usage`, `daily_threat_stats`

Platform & Billing (5 tables)

`threat_feeds`, `site_settings`, `system_config`, `add_ons`, `user_add_ons`

Integrations & Reports (6 tables)

`sync_tokens`, `phishing_bulletins`, `attack_surface_scans`, `attack_surface_assets`, `threat_reports`, `report_schedules`

Visitor, Messaging & Submissions (6 tables)

`site_visitors`, `daily_visitor_counts`, `logo_votes`, `sms_messages`, `live_chat_sessions`, `exploit_submissions`

Why STBCS for Your Business

The Problem

- SMBs are disproportionately targeted by ransomware and cyber attacks
- SMBs typically lack the budget for enterprise SIEM platforms
- Most SMBs have zero dedicated security staff
- Threat intelligence is fragmented across dozens of disconnected free tools
- Compliance requirements are growing, but in-house expertise isn't

The STBCS Solution

- **One platform** replacing 10+ point solutions
- **134 built-in threat feeds** aggregated and correlated automatically (plus 9 optional API-key integrations)
- **Professional services** available when you need expert hands, not just dashboards
- **Compliance-ready** with built-in NIST, CIS, and ISO mapping
- **Enterprise features** at SMB prices: \$0/month for core intelligence, \$24.99/month for full Pro access
- **No infrastructure to manage** — fully hosted, always-on, continuously updated

Value Comparison

TRADITIONAL APPROACH	WITH STBCS
10+ browser tabs of free threat feeds	1 unified dashboard
Manual CVE tracking in spreadsheets	Automated CVE monitoring with EPSS prioritization
No ransomware visibility	Real-time group tracking with victim correlation
Separate uptime monitoring service	Included in Supporter tier (\$74.95/year)
Separate threat intelligence platform	Full Pro access for \$249.95/year
External compliance consulting	Built-in NIST/CIS/ISO mapping + professional services
No incident response capability	Expert IR team on standby

Contact & Next Steps

Website: stbcybersecurity.com **Phone:** (855) STB-1987 **Email:** kbpc.inc@gmail.com

- **Start Free:** Create an account and explore the full threat intelligence dashboard at no cost
- **Try Pro:** Get 50% off your first subscription — full security tooling for \$24.99/month
- **Talk to Us:** Schedule a consultation for Incident Response, Ransomware Recovery, or Cybersecurity Consulting
- **Enterprise Inquiry:** Contact us for custom Business or Unlimited tier deployments with dedicated support
